Dear Hiring Manager,

I successfully completed IT courses at GoIT Academy as a Full Stack Developer, which gave me a solid foundation in web development. Training and self-education combined with practical experience of working on real projects allowed me to develop the skills of cooperation in a team, understanding of business needs and execution of tasks on time and with high quality. During my previous projects, I was involved in the development of interactive interfaces, implementation of responsive design to support mobile devices, optimization of website performance and many other tasks. Thanks to this experience, I understand the requirements of high-quality software and am able to achieve results in collaboration with cross-functional teams.

I believe that my knowledge, motivation and experience in web development make me an ideal candidate for the position of frontend developer in your company. I would be delighted to have the opportunity to discuss my achievements and to attend an interview to further discuss how I can make a valuable contribution to your organisation.

Thank you for your attention to my candidacy. I look forward to the opportunity to meet in person and demonstrate my skills and potential.

Sincerely, Roksolana Kushnir
